Sample Number:

Substrate:

Size:

Notes:

Date/Time	Event Name	Description/Notes	Reference
YYYY.MM.DD HH:MM (24h format)	Short name of process step. E.g. Deposition, XRD, Etch.	Notes about event. (Optional) E.g. 10nm Au, 1000°C, etc.	Lab notebook entry and filename

For best results: Print on cleanroom paper. Apply 3-hole punch. Always fill out the "Sample Number" and "Page" fields. Return to sample log binder promptly.
More information is better than less information: use space liberally and print more sheets rather than save space at the expense of info.
